
Yasui Architects & Engineers, Inc. won the first prize in a design competition

Design Competition for Baisha Island Forum Permanent Venue Complex Building in Liaoning Province Shenfu Reform and Innovation Demonstration Zone

Yasui Architects & Engineers, Inc. (Head office: Chuo-ku, Osaka/President: Yoshihiko Sano) participated in the "Design Competition for Baisha Island Forum Permanent Venue Complex Building in Shenfu Reform and Innovation Demonstration Zone," a design competition in Liaoning Province, China, and won first prize among the five finalists.

This project is for constructing four complex facilities that will become the core of a new area being developed as the latest model representing China's development, on a planned site of approximately 58,000m² in Baisha Island, a suburb of Shenyang City.

Yasui Architects & Engineers, Inc. is in charge of the basic design, schematic design, and construction documents. The project is planned to be completed in 2024.

1. Competition and Planned Site Overview

- This public submission competition was announced and took place in January 2021, and the results were announced on March 5th.
- The planned site in Baisha Island is in a wetland with abundant greenery and water. The area attracts many wild birds including migratory birds, and has superb snow-covered winter scenery. As the latest economic development model, the area is subject to the Shenfu Reform and Innovation Demonstration Zone—a massive plan to promote structural reform,

entrepreneurship, and innovation.

2. Construction Plan Overview

- The total floor area is approximately 120,000m², including the complex facilities below:
 - (1) International conference center (conference hall with 2,000 seat capacity)
 - (2) Exhibition and banquet halls (1,500 seat capacity for banquet and exhibition facilities)
 - (3) Hotel building (5-star hotel with approximately 300 guest rooms)
 - (4) Four luxury condominium buildings
- Design work will be carried out in collaboration with the Chinese design office, ARTS GROUP Co., Ltd.

3. Concept of the Proposal

- The basic concept is “coexistence with the nature of Shenyang—white snow, herons, and Baisha Island” and “development and collaboration by people through creativity, innovation, and creation of the future.”
- The proposed landscape organically combines urban open spaces and the natural environment, while rationally laying out the buildings with different characteristics in harmony with nature. The plan ensures comfort will be provided to users of the facilities in Baisha Island, surrounded by rich nature.
